8M X 2.1M END LINKED FLAT PACKED CONTAINER BUNDLE (POWDER COATED)

FLAT PACK CONTAINERS

CX-CID-5201BA · SKU 09a69de15cf8 · Nov 16, 2026

OVERVIEW

A flat pack unit is a panelized building engineered to ship as a compact bundle. The structure is a galvanized steel frame, base, corner columns and roof assembly, that bolts together on site, with insulated sandwich panels dropping into the frame channels as walls. The roof assembly includes integrated drainage, and floor panels lock onto the base frame. Windows, a lockable door and wiring provisions come fitted or pre-cut, so a small crew takes it from bundle to building in a working day.

Operations teams like flat packs because freight is the quiet budget killer: several container buildings travel stacked on one truck, then spread across the site as offices, guard posts and break rooms.

FIG. 2

PRIMARY USES

- Pop-up retail kiosks and seasonal shops
- Remote camp accommodation and utility rooms
- Clinic and screening rooms deployed in days
- Classroom and training-room expansions
- Multi-unit linked buildings for larger floor plans
- Rapid-assembly site office delivered on a single pallet stack

KEY FEATURES

- Wiring channels and junction provisions built into panels
- Repackable design for relocation to the next site
- Complete building shipped as one compact flat bundle
- Galvanized frame for outdoor durability
- Fitted windows with seals installed
- Pre-hung insulated door with keyed lock
- Side-by-side linking kits for multi-unit buildings

BENEFITS

- Light enough for sites and floors containers cannot reach
- Disassembles and moves again without demolition
- Pre-cut wiring channels and fitted windows arrive ready
- Units link side by side to grow into larger buildings
- No crane required on most sites; a forklift or pallet handling suffices
- Ships flat, several units stack in one truckload, slashing freight cost

INDUSTRIES SERVED

- Retail
- Construction
- Government
- Education
- Security
- Healthcare
- Mining and energy
- Logistics

SPECIFICATIONS AT A GLANCE

CONTAINER ID	CX-CID-5201BA
SKU	09a69de15cf8
CATEGORY	Flat Pack Containers
PRICE	$2,880.00
AVAILABILITY	In stock - ready to ship

Full specifications and a dimensional drawing are on this unit's Specification Sheet, available on the product page.

SITE PREPARATION CHECKLIST

- Check drainage so water sheds away from the floor frame
- Rough in electrical conduit to the planned junction point
- Clear and level the assembly area with room to lay panels flat
- Plan forklift or liftgate offloading for the banded bundle
- Gather tools and a two-to-three person crew for assembly day
- Prepare a level base: compacted gravel, slab, pavers or timber bearers

DELIVERY NOTES

- The bundle arrives by freight truck; standard access of about 12 ft wide is plenty
- Offloading needs a forklift on site or liftgate service booked in advance
- No tilt-bed run is required, but keep a firm, level spot for the pallet set-down
- Someone must be present to receive, count the bundle against the packing list and sign
